Sub: Miscellaneous Petition seeking recovery/adjustment of Transmission Deviation Charges paid by SJVN Limited with regard to Nathpa Jhakri Hydro Power Station (6 x 250 MW) and Rampur Hydro Power Station (6 X 68.67 MW) in terms of Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020 during the period from 01.11.2020 to 30.09.2023 while providing primary response to the Grid.

Respected Sir,

Please find enclosed herewith four copies (One Original + Three Copies) of Miscellaneous Petition seeking recovery/adjustment of Transmission Deviation Charges paid by SJVN Limited with regard to Nathpa Jhakri Hydro Power Station (6 x 250 MW) and Rampur Hydro Power Station (6 X 68.67 MW) in terms of Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020 during the period from 01.11.2020 to 30.09.2023 while providing primary response to the Grid, along with Acknowledgement slip of e-filing portal for kind consideration before the Hon'ble CERC. The copy of the petition is available on SJVN website under URL: www.sjvn.nic.in.

सधन्यवाद,

संलग्न: यथोक्त

PETITION UNDER SECTION 12, 27 AND 28 OF THE CENTRAL ELECTRICITY REGULATORY COMMISSION (SHARING OF INTER-STATE TRANSMISSION CHARGES AND LOSSES) REGULATIONS, 2020; READ WITH CENTRAL ELECTRICITY REGULATORY COMMISSION (INDIAN ELECTRICITY GRID CODE) REGULATIONS, 2010 AND 2023 AND ITS AMENDMENTS; AND SECTION 65,67 AND 68 OF THE CONDUCT OF BUSINESS REGULATIONS, 2023.

MOST RESPECTFULLY SHOWETH:

1. The Petitioner, SJVN Limited is a Company incorporated under the provisions of the Companies Act, 1956 and has its registered office at Shakti Sadan, Corporate Office Complex Shanan, Shimla, Himachal Pradesh. SJVN Limited is a Joint Venture of the Government of India and the Government of Himachal Pradesh with the Government of India holding the majority and controlling shares in SJVN Limited. SJVN Limited is also a generating company within the meaning of Section 2 (30) of the Electricity Act, 2003. SJVN Limited being a Company owned and controlled by the Government of India is within the regulatory control and jurisdiction of the Hon'ble Commission under Section 79 (1) (a) of the Electricity Act, 2003.
2. SJVN Limited has established the Nathpa Jhakri Hydro Power Station (hereinafter referred as the 'NJHPS') comprising of six units of 250 MW each aggregating to 1500 MW in Shimla and Kinnaur Districts in the State of Himachal Pradesh. NJHPS is constructed on the river Sutlej. The project is a run of river with pondage scheme to hold water sufficient for at least three hours peaking and to be released for generation of electricity keeping in view the optimum use of the water for generation and supply of electricity to the beneficiaries- Respondents 1 to 15.

[Handwritten signature]

[Handwritten signature]

[Handwritten signature]
Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

3. SJVN Limited has also established the Rampur Hydro Power Station (hereinafter referred to as the '**RHPS**') comprising of six units of 68.67 MW at the downstream of NJHPS to harness and have optimum use of water getting released from the NJHPS again for generation and supply of electricity to the Respondents 1 to 12.
4. The generating units of NJHPS were commissioned during the year 2004-05 and the units of RHPS were commissioned during the year 2014-15. RHPS is built to operate in tandem with the generation of upstream project i.e. NJHPS and is dependent on the availability of the water being released during the operation of the NJHPS. RHPS is a unique generating station which does not have its own storage / pondage at all and is operating with water coming out from the Tail Race Tunnel (TRT) of NJHPS and thus is acting as a tail race extension of NJHPS. The water so flowing after being used for generation in NJHPS is diverted into the RHPS intakes through the TRT pond. The discharge of water released from NJHPS is being utilized by RHPS in steady state conditions avoiding any spillage of water at TRT of NJHPS to generate electricity as mentioned above.
5. The scheduling of NJHPS and RHPS is being done by Respondent no. 17- NRLDC in accordance with the provisions of prevailing Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2023 (hereinafter referred to as **IEGC Regulations**) and earlier in terms of Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2010 & its amendments from time to time. With the droop setting in the range of 5 to 6 %, SJVN generating stations viz NJHPS and RHPS are giving primary response to the Grid in accordance with the applicable provisions of IEGC Regulations.
6. The Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020 (hereinafter referred to as **CERC Sharing Regulations, 2020**) was notified on 04.05.2020 with applicability

19/10

21/10/20

31/10

2

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan

from 01.11.2020 onwards. The relevant provisions of aforesaid Regulations are reproduced here as under:

Regulation (12): Transmission Deviation

(1) Transmission Deviation, in MW, shall be computed as under:

- (a) For a generating station, net metered ex-bus injection, in a time block in excess of the sum of Long Term Access, Medium Term Open Access and Short Term Open Access:*

Provided that for a hydro-generating station, overload capacity of 10% during peak season shall be taken into account.

.....

(2) Transmission Deviation Rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be computed as under:

*1.05 X (transmission charges of the State for the billing month in Rs.)/
(quantum in MW of Long Term Access plus Medium Term Open Access of
the State for the corresponding billing period X 2880).*

(The relevant pages of CERC Sharing Regulations, 2020 are enclosed as **Annexure-I**)

7.0 In this regard the relevant provisions of Central Electricity Regulatory Commission (Indian Electricity Grid Code) (Fifth Amendment) Regulations, 2017 notified on 12.04.2017 are reproduced here as under:

(7) The first sentence of Regulation 5.2(h) of Part 5 of the Principal Regulations, shall be substituted as under:

"All coal/lignite based thermal generating units of 200 MW and above, Open Cycle Gas Turbine/Combined Cycle generating stations having gas turbines of more than 50 MW each and all hydro units of 25 MW and above operating at

ATG

21/11/20

SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

or up to 100% of their Maximum Continuous Rating (MCR) shall have the capability of (and shall not in any way be prevented from) instantaneously picking up to 105%, 105% and 110% of their MCR, respectively, when the frequency falls suddenly.”

(8) The following shall be added at the end of Regulation 5.2 (h) of Part 5 of the Principal Regulations:

"For the purpose of ensuring primary response, RLDCs/SLDCs shall not schedule the generating station or unit(s) thereof beyond ex-bus generation corresponding to 100% of the Installed capacity of the generating station or unit(s) thereof. The generating station shall not resort to Valve Wide Open (VWO) operation of units whether running on full load or part load, and shall ensure that there is margin available for providing Governor action as primary response.....

Provided that scheduling of hydro stations shall not be reduced during high inflow period in order to avoid spillage:

Provided further that the VWO margin shall not be used by RLDC to schedule Ancillary Services.”

*(The relevant pages of 5th Amendment of CERC IEGC Regulations, 2017 are enclosed as **Annexure-II**)*

8.0 Thereafter, Hon’ble Commission vide notification dated. 07.02.2023 has issued first amendment of the Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses), Regulations, 2023, which is applicable from 01.10.2023 onwards. The relevant provisions of aforesaid Regulations are reproduced here as under:

10. Amendment to Regulation 12 of the Principal Regulations:

(1) Clauses (1) a n d (2) of Regulation 12 of the Principal Regulations shall be substituted as under:

“(1) Transmission Deviation, in MW, shall be computed as under:

गीत

21/10/23

3/11/23

[Signature]
Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

- (a) *For a generating station including ESS and captive generating plant, transmission deviation shall be net metered ex-bus injection, in a time block in excess of GNA of such entity:*

Provided that for a hydro-generating station, schedules for overload capacity as permissible under the Grid Code during peak season shall not be considered for computing the transmission deviation:

Provided further that transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station, subject to verification of such over-injection by concerned RPC:

Provided also that each RPC shall issue necessary guidelines for furnishing the data by the generating stations regarding their primary response.

-
- (2) *Transmission Deviation Rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be computed as under:*

1.25 X (total transmission charges for all drawee DICs located in the State, (as calculated in accordance with Regulation 5 to 8 of these regulations) for the billing month in Rs.)/ (GNA and GNARE quantum in MW of such entities located in the State, considered for billing, for the corresponding billing period X number of days in a month X 96)."

(The relevant pages of 1st Amendment of CERC Sharing Regulations, 2023 are enclosed as **Annexure-III**)

- 9.0 Thus, for the period from 01.11.2020 to 30.09.2023 in accordance with the provisions of 5th Amendment of CERC IEGC Regulations, 2017, RLDC scheduled the generating stations corresponding to the 100 % of the Ex-Bus Installed capacity of generating stations and additionally a margin of 10 % overloading was permitted during peaking hrs.

5
Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

However, the transmission deviation charges have been levied on the generating stations as per the provisions of CERC Sharing Regulations, 2020, even for giving primary support for Grid stability i.e. during the non-peak season if it exceeds 1482 MW for NJHPS and 407.90 MW for RHPS i.e. beyond the Ex-Bus injection in a time block in excess of the sum of Long-Term Access, Medium-Term Open Access and Short-Term Open Access and in peak season if it exceeds 1630.50 MW for NJHPS and 448.67 MW for RHPS that is beyond Ex-Bus injection in a time block in excess of the sum of Long-Term Access, Medium-Term Open Access and Short-Term Open Access and the additional margin of 10 % overloading. Thus, for the period from 01.11.2020 to 01.10.2023 there is a contradiction between 5th Amendment of CERC IEGC Regulations, 2017 notified on 12.04.2017 and Regulation 12 (1) notified under CERC Sharing Regulations, 2020 notified on 04.05.2020.

10.0 The Northern Regional Power Committee (NRPC) vide letter no NRPC/Comml/202/RTA/2023/975-2014 and NRPC/Comml/202/RTA/2023/935-974 dtd. 31.01.2023 had issued Regional Transmission Deviation Account in respect of SJVN's power stations - NJHPS and Rampur HPS along with other utilities of Northern Region for the period from April, 2022 to December, 2022 and thereafter regularly on Monthly basis. During the high inflow period, SJVN's generating stations have been levied with substantial penalties due consideration of peak season from June to September during FY: 2022-23.

11.0 Thereafter, NRPC vide letter no. CEA-GO-17-14(11)/1/2023-NRPC dtd. 31.07.2023 has amended Regional Transmission Deviation Account for the billing period November, 2020 to April, 2023 and high inflow season for FY

6

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

2021-22 and FY 2022-23 was also finalised for NJHPS and RHPS under Special cases (**Refer Annexure-IV**):

Special cases:

a. Regulation 12.1(a) provides that, for a hydro-generating station, overload capacity of 10% during peak season shall be taken into account. As such, LTA quantum used for calculation of RTDA is increased by 10% for High flow months as follows:

Station	Fy 2021-22	Fy 2022-23
Nathpa Jhakri	May to September	May to September
Rampur	May to September	May to September

12.0 Further, in the 212th Operation Co-ordination Sub-Committee Meeting of NRPC held on 20.10.2023, the High Flow Season during FY: 2023-24 for SJVN's Power Stations viz NJHPS & RHPS was again finalised from June to September in compliance of Regulation 45.8 (a) of IEGC Regulations, 2023 (Refer **Annexure-V**). It is submitted that for hydro generating stations, to confine high flow months to only 4 months and low flow months for 8 months doesn't not taken into consideration the actual water inflow, i.e the water inflow will slowly transition from low inflow months to high inflow months and vice versa. The same is dependent on various factors such as seasonal variations, precipitation patterns etc. In light of the above considerations, strictly defining the peak season or high inflow months as June to September, and treating the rest as the non-peak season, is not an accurate way to understand the implications of any deviations that occur due to primary response.

13.0 Further, as mentioned above, in compliance of 5th Amendment of CERC IEGC Regulations, 2017 prevailing during the period from 01.11.2020 to 30.09.2023,

[Handwritten signature]

[Handwritten signature]

[Handwritten signature]

[Handwritten signature]
Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan

generators were giving primary response during the non-peak season; and during the peak season generators provided peaking support to the Grid by operating up to 10 % overloading beyond Ex-bus installed capacity and also provided primary response wherever needed as per the droop setting defined in the CERC IEGC Regulations. Therefore, the generators should not be penalized by imposition of Transmission Deviation Charges for giving primary response to the Grid, i.e., in case the Grid frequency decreases below the frequency band defined as per CERC DSM Regulations and the generator provides additional primary support to the Grid by the way of over injection, then such over injection should be excluded while calculating transmission deviation charges.

Therefore, NRPC ought to have computed the transmission deviation charges taking into consideration the exigencies which arise due to fluctuations in the Grid frequency.

- 14.0 This Hon'ble Commission vide notification dtd. 07.02.2023 issued the first amendment of 'Sharing of Inter-State Transmission Charges and Losses' Regulations, 2020, effective from 01.10.2023 onwards, wherein primary response given by generating stations has been excluded for while calculating the transmission deviation charges.

However, as per the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020, transmission deviation charges amounting to Rs 2,08,29,442/- has been levied upon NJHPS and RHPS during the period from 01.11.2020 to 30.09.2023 while giving primary response for Grid stability, which is in contradiction to the "5th Amendment of CERC IEGC Regulations, 2017" and "1st Amendment of CERC Sharing Regulations, 2020".

Shanan, Shimla-171006 (HP)

15.0 SJVN vide letter no. SJVN/CC/2023/398 dtd 29.08.2023 has prayed to the Hon'ble Commission for wavier of transmission deviation charges levied on SJVN generating stations (NJHPS and RHPS) for over injection up to 110 % MCR during peaking hrs of lean season (from October to April months) for the period from 01.11.2020 to 30.09.23 in line with first amendment of CERC Sharing of Transmission Charges and Losses Regulations, 2020. The copy of letter is enclosed as **Annexure-VI** for kind reference please.

16.0 The aforesaid issue of Transmission Deviation charges levied on NJHPS and RHPS was taken up in various NRPC Meetings as detailed below:

- a) 47th Commercial Sub-Committee Meeting of NRPC held on 28.08.2023, wherein following is stated in Minutes of the Meeting (**Refer Annexure-VII**):

Letter be written to CERC regarding Transmission deviation charges of all hydro generators for the period from implementation of Sharing of Inter-State Transmission Charges and Losses Regulations, 2020 to 30th September 2023 due to primary response.

- b) 48th Technical Coordination Committee and 70th NRPC Meeting held on 18.11.23, wherein SJVN has raised following issues for deliberations:

- For the period from 01.11.2020 to 30.09.2023, imposition of transmission deviation charges on NJHPS and RHPS, in-spite of giving primary response to the Grid in compliance of 5th Amendment of CERC IEGC Regulations, 2017.
- Developing a procedure aligned with CERC IEGC Regulations and CERC DSM Regulations, for calculating primary response, particularly during instances when Grid frequency decreases below the frequency

9

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

band defined as per CERC DSM Regulations and the generator provides additional primary support to the Grid by the way of over injection.

After Deliberation at TCC/NRPC forum, following is stated under Minutes of the Meeting, as recorded on 08.12.2023 (**Refer Annexure-VIII**):

NRPC Deliberation:

Forum concurred on deliberation held in the TCC meeting.

Decision of NRPC Forum:

- i. Forum acknowledged the issue of generators and agreed that generators shall not be penalized for supporting grid. However, relaxation from regulation is not mandate of NRPC. Therefore, for waiver of transmission deviation charges for the period 01.11.2020 to 30.09.2023, generators may approach CERC.*
- ii. Chairperson, CEA may be apprised this issue of generators as he is ex-officio member of CERC.*
- iii. The methodology for waving off these deviation charges starting from 01.10.2023 will be discussed in the next Commercial Sub-Committee meeting, to be scheduled in 1st week of December.*
- iv. Generators were asked to provide input such as set value, droop, etc. to NRPC Sectt.*

- Further in line with the direction of TCC/NRPC forum, agenda was put up in 48th Commercial Sub-Committee Meeting held on 04.12.2023, as under:

ITEM-2 Calculation of Transmission Deviation charges due to Primary Response (Agenda by NRPC Sectt.)

2.1 Regulation 12(2) of Amendment-I to CERC (Sharing of ISTS Charges and Losses) Regulations, 2023 provides that:

At

Shanar, Shimla-171002 (H.P.)

“Transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station, subject to verification of such over injection by concerned RPC: Provided also that each RPC shall issue necessary guidelines for furnishing the data by the generating stations regarding their primary response”.

2.2 *EE(C) apprised that a methodology was deliberated in 212th OCC meeting, however, due to no consensus, matter was deferred to the upcoming CSC meeting. Further, present methodology shall be continued in the meanwhile and RTDA accounts from October, 2023 onwards would be revised after finalization of the said methodology.*

2.3 *GM, NRLDC apprised that a philosophy may be developed based on the similar lines as devised by SRPC.*

Decision of Sub-committee:

2.4 *After detailed deliberation it was decided for incorporating primary response in RTDA calculation, methodology for NR will be finalized in a separate meeting. Further, present methodology shall be continued in the meanwhile and RTDA accounts from October, 2023 onwards would be revised after finalization of the said methodology.*

17.0 It is submitted that NRPC forum acknowledged the issue of generators and agreed that generators shall not be penalized for supporting the grid and also submitted that relaxation from a Regulation is not mandate of NRPC; therefore, generators may approach Hon'ble Commission for waiver of transmission deviation charges for the period 01.11.2020 to 30.09.2023.

SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

- 18.0 In view of the above proceedings before the NRPC forum, this petition is being filed before the Hon'ble Commission regarding levy of penalty on SJVN's generating stations (NJHPS and RHPS) on account of Transmission Deviation Charges for the period from 01.11.2020 to 30.09.2023 which is in contradiction between "5th Amendment of CERC IEGC Regulations, 2017" and "1st Amendment of CERC Sharing Regulations, 2020".
- 19.0 As mentioned above, as per the relevant provisions of CERC (Sharing of Transmission Charges and Losses Regulations), 2020, the transmission deviation has been made applicable beyond the net metered ex-bus injection in a time block in excess of GNA of such entity during non-peak season i.e. applicable beyond 1482 MW for NJHPS and 407.90 MW for RHPS. Further transmission deviation charges have been made applicable if during the peak season the injection exceeds 1630.50 MW for NJHPS and 448.67 MW for RHPS. This is irrespective of the fact that the above injection might be on account of primary response by NJHPS and RHPS.
- 20.0 The NJHPS is a Run -of -River with Pondage station and gives peaking support to the grid in accordance with the provision of CERC IEGC Regulations as well as CERC Tariff Regulations prevailing during the period. GNA for NJHPS and RHPS are 1482 MW and 407.90 MW respectively, which is ex-bus installed capacity of the stations. Injection beyond ex-bus installed capacity/ GNA of the generating stations (viz NJHPS and RHPS) as per CERC IEGC Regulations, 2015 and its amendments have attracted penalty to the generating stations during the non-peak season as per CERC Sharing Regulations, 2020 and its amendment irrespective of the Grid frequency and irrespective of the fact that the deviations are on account of primary response. Similarly, as mentioned above during peak season, beyond permissible limit of 1630.50 MW for NJHPS and 448.67 MW

12

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

for RHPS transmission deviation charges have been made applicable even when the same is for primary response.

- 21.0 In furtherance to the above, it is submitted that RLDC is giving schedule to NJHPS and RHPS in accordance with the provisions of CERC IEGC Regulations, 2015 and its amendments. RLDC is declaring peaking Hours (3 Hrs in a day for Pondage stations) for hydro generating stations regularly and publishing at their website. Considering 3 hours peaking in a day, schedule corresponding to ex-bus installed capacity of generating station is given by RLDC during peaking hrs based on declared capacity given by Generating stations. During lean season, NJHPS and RHPS schedule is given by RLDC during peaking Hrs maximum upto 1482 MW and 407.90 MW respectively for 12 blocks in a day or lower as per the requirement in Grid.

In case of frequency reduction in the Grid, generating stations respond as per their droop setting and some times more power is injected based on requirement of the Grid. Thus, during peaking Hrs in the lean season, actual generation becomes higher than the GNA while giving primary response. It is submitted that no deviation penalty ought to be imposed in such cases. However, as per the provisions of CERC Sharing of Transmission Charges and Losses Regulations, 2020 and its amendments, transmission deviation penalty is levied on the generating stations for extra injection beyond the GNA of the generating station during low inflow season/lean season.

- 22.0 SJVN submits that despite efforts made at aforementioned NRPC meetings, the matter relating to transmission deviation penalty levied on the generating stations for injection beyond ex-bus installed capacity/ GNA during the lean season and beyond the permissible limit of additional 10% during the peak season for the purposes of primary response could not be resolved and NRPC

SJVN Limited, Shakti Centre

forum has opined that generator may approach this Hon'ble Commission for waiver of transmission deviation charges for the period 01.11.2020 to 30.09.2023.

23.0 As deliberated above, SJVN has been levied a penalty of Rs 2,08,29,442 /- due to Transmission Deviation Charges for the period 01.11.2020 to 30.09.2023 for injection beyond ex-bus installed capacity/ GNA during the lean season and beyond the permissible limit of additional 10% during the peak season for the purposes of primary response. The copy of details of Transmission Deviation is enclosed as **Annexure-IX**.

24.0 It is humbly submitted that SJVN will suffer irreparably if the above issue is not directed to be rectified. NRPC forum has acknowledged the issue of generators (NJHPS and RHPS) and agreed that generators should not be penalized for supporting grid. However, as relaxation from regulation is not mandate of NRPC, SJVN Limited has come before the Hon'ble Commission.

25.0 In view of the above, SJVN Limited prays to the Hon'ble Commission to invoke its powers to remove difficulties and relax as per Part 7 – “Miscellaneous” of the Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2010, Chapter 10- of the Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2023, read with Section 27 and 28 of the Central Electricity Regulatory Commission (Sharing Of Inter- State Transmission Charges And Losses) Regulations, 2020 to take into consideration that Transmission Deviation charges may not be applicable on the generating stations of SJVN Limited i.e NJHPS and RHPS if stations are providing primary response and providing peaking support to the Grid. The power vested in Part 7 – “Miscellaneous” of the Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2010;

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Chennai - 600 036

Chapter 10- of the Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2023, read with Section 27 And 28 of the Central Electricity Regulatory Commission (Sharing Of Inter- State Transmission Charges And Losses) Regulations, 2020 is based on the fact that the Hon'ble Commission may not be able to provide regulations dealing with all eventualities. This is like a power to exempt/relax which the Hon'ble Supreme Court had considered the nature in:

a) *Premium Granites & Anr.-v-State of Tamil Nadu & Ors (1994) 2 SCC 691:*

"48. After considering the facts and circumstances of the case and giving our careful consideration to the arguments advanced by the learned Counsels for the respective parties, it appears to us that the MMRD Act was enacted by the Parliament under Entry 54 List 1 of the 7th Schedule to the Constitution. The aforesaid Entry enables the Central Government to regulate mines and mineral development in public interest by making such declaration and the Parliament, has, in fact, made such declaration by Section 2 of the MMRD Act. In respect of minor minerals, the Parliament by the said MMRD Act has left the powers of regulating minor minerals to the State Governments under Section 15 of the MMRD Act. Different State Governments have exercised such power under Section 15 of the MMRD Act and State of Tamil Nadu has enacted in 1959 the Mineral Concession Rules. There is no dispute that the MMRD Act and the rules framed thereunder either by the Central Government or by the State Government are for mineral development subserving the cause of public interest. It cannot also be disputed that mineral development is not a vague expression and the MMRD Act and the rules framed under it, clearly furnish the scope and purport of the word "mineral development". It has been very reasonably contended that scientific exploitation of minerals without waste is undoubtedly a part of mineral development as envisaged by the MMRD Act and the rules framed thereunder. The expression "public interest" finds place in the Constitution and in many enactments which have since been noted and considered by this Court in various decisions. The said expression is, therefore, a word of definite concept. There is also force in the contention of the appellants that the guidelines need not be expressly found in the impugned provisions but

नति

21/11/24

3771

15

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanar, Shimla 171006

such guidelines can be gathered from the setting of the Act and the rules framed thereunder. Such contention gets support from the decisions of this Court in P.J. Irani (supra), K. Kandaswamy Chettiar (supra), Jalan Trading Co. (supra), Workmen of Meenakshi Mills Ltd. (supra).

49. The power of relaxation under Rule 39 of Mineral Concession Rules is to be exercised for "mineral development" and "in public interest" after recording reasons for such exercise of power. In our view, it has been rightly contended by the learned Counsel in support of the validity of the Rule 39, that the exercise of power under the said Rule 39 cannot be made arbitrarily, capriciously and on subjective satisfaction of the concerned authority but the same is to be exercised within the parameters of "mineral development" and "in public interest" which as aforesaid, are not vague and indefinite concepts. Such exercise of power must satisfy the reasonableness of state action before a court of law if any challenge of improper action in exercise of the said power under Rule 39 in a given case is made. It has been held by the Constitution Bench of this Court in Meenakshi Mill's case (supra) that if a speaking order is required to be passed on objective consideration, such provision is not vitiated on the ground of absence of a provision for appeal or review because the remedy available by way of judicial review is by itself an adequate safeguard against improper and arbitrary exercise of power. It has also been held by this Court in the said decision that requirement of giving reasons for exercise of the power by itself excludes chances of arbitrariness.

50. The observation made in the majority decision in Delhi Transport Corporation's case (supra) as referred to hereinbefore should be appreciated with reference to the facts and circumstances of a case and the true import of a provision under which a discretionary power is to be exercised. While no exception can be made to the observation of this Court in the said decision that "It would be both unwise and impolitic to leave any aspect of its life to be governed by discretion when it can conveniently and easily be covered by the rule of law", it should also be borne in mind that it is not always feasible and practical to lay down such exhaustive written guidelines which can cover all contingencies. It has, therefore, become necessary to make provisions for exercise of discretion in appropriate cases by giving broad guidelines and indicating the

10/10

31/7

16

*Chief General Manager
C&SO Deptt.*

*SJVN Limited, Shakti Sadan
Chennai - 600 084*

parameters within which such power is to be exercised. In various decisions referred to hereinbefore, this Court has upheld such exercise of discretion if the same does not appear to be wholly uncontrolled, uncanalised and without any objective basis.

51. "Public interest" is a paramount consideration in the MMRD Act itself and the rules framed thereunder cannot but subserve 'public interest' in furthering the cause of mineral development. We are, therefore, unable to hold that Rule 39 is per se obnoxious and having contained unbridled, unguided and uncanalised discretionary power offends Article 14 of the Constitution."

b) Hindustan Paper Corporation Limited v. Government of Kerala (1986) 3 SCC 398:

"9. ... In almost all the statutes by which the fiscal or economic interests of the State are regulated, provision for granting exemption in appropriate cases would have necessarily to be there and the power to grant exemption is invariably conferred on the Government concerned. The Legislature which is burdened with heavy legislative and other types of work is not able to find time to consider in detail the hardships and difficulties that are likely to result by the enforcement of the statute concerned. It has, therefore, now become a well-recognised and constitutionally accepted legislative practice to incorporate provisions conferring the power of exemption on the Government in such statutes. Such exemptions cannot ordinarily be granted secretly. A notification would have to be issued and published in the Gazette and in the ordinary course it would be subject to the scrutiny by the Legislature. The power can be exercised only in the public interest as provided by the Section itself. The validity of provisions conferring the power of exemption has been consistently upheld by this Court in a number of decisions commencing with the State of Bombay and Anr. v. F.N. Balsara [1951]2SCR682."

c. ***Hindustan Steels Ltd. v. A.K. Roy, (1969) 3 SCC 513:***

"14. The question, however, still is whether the Tribunal was, in the circumstances of the case, justified in directing reinstatement. It is true that some of the decisions of this Court have laid down that where the discharge or dismissal of a workman is not legal or justified, the relief which would ordinarily follow be reinstatement. The Tribunal, however, has the discretion to award compensation instead of reinstatement if the circumstances of a particular case are unusual or exceptional so as to make reinstatement inexpedient or improper. The Tribunal has, therefore, to exercise its discretion judicially and in accordance with well-recognised principles in that regard and has to examine carefully the circumstances of each case and decide whether such a case is one of those exceptions to the general rule. If the Tribunal were to exercise its discretion in disregard of such circumstances or the principles laid down by this Court it would be a case either of no exercise of discretion or of one not legally exercised. In either case the High Court in exercise of its writ jurisdiction can interfere and cannot be content by simply saying that since the Tribunal has exercised its discretion it will not examine the circumstances of the case to ascertain whether or not such exercise was properly and in accordance with the well-settled principles made. If the High Court were to do so, it would be a refusal on its part to exercise jurisdiction.

In the present case, there could be no dispute that the company, in accordance with its practice, called for a verification report about the concerned workman. The report was made by the police after investigation and on that being adverse, the company's security officer recommended to the company that it was not in the interests of the company to retain the workman's services. There can be no doubt that the company terminated the service of the workman only because it felt that it was not desirable for reasons of security to continue the workman in its services. This is clear from the fact that it was otherwise not interested in terminating the workman's service and had in fact insisted that the workman should bind himself to serve it at least for five years. The termination of service was not on account of victimisation or unfair labour practice as was clearly found by the Tribunal. It is, therefore, abundantly

18

Handwritten signature
Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

clear that the company passed the impugned order of termination of service on account of the said adverse report, the recommendation of its own Security Officer and on being satisfied that it would not be in the company's interests to continue him in its service.

16. On a consideration of all the circumstances, the present case, in our view, was one such case. The Tribunal exercised its discretion mechanically without weighing the circumstances of the case. That was no exercise of discretion at all. There is ample authority to the effect that if a statutory tribunal exercises its discretion on the basis of irrelevant considerations or without regard to relevant considerations, certiorari may properly issue to quash its order. [See S.A. de Simith, *Judicial Review of Administrative Action*, (2nd Edn.) (324-325)]. One such relevant considerations, the disregard of which would render its order amenable to interference, would be the well-settled principles laid down in decisions binding on the tribunal to whom the discretion is entrusted. The refusal by the High Court to interfere was equally mechanical and amounted to refusal to exercise its jurisdiction. Its order, therefore, becomes liable to interference."

26.0 In the facts and circumstances mentioned herein above, SJVN Limited has filed this petition before the Hon'ble Commission to intervene in this matter and give relaxation to NJHPS and RHPS for amount payable on account of Transmission Deviation charges for the period from 01.11.2020 to 30.09.2023 for injection beyond ex-bus installed capacity/ GNA during the lean season and beyond the permissible limit of additional 10% during the peak season for the purposes of primary response.

27.0 The Petitioner has paid the requisite court fees (**Annexure-X**).

28.0 The present Petition is within the jurisdiction of the Hon'ble Commission.

Shanan, Shimla-171006 (HP)

29.0 The Petitioner has not filed any other petition or proceedings before any forum in regard to the matters contained in the present petition and the relief claimed.

30.0 It is respectfully prayed that this Hon'ble Commission may be pleased to:

- (a) Admit the petition and direct proceedings to be initiated for considering the aspects which have arisen in the present petition;
- (b) Direct that no penalty on account of Transmission Deviation Charges may be payable by NJHPS and RHPS for the period from 01.11.2020 to 30.09.2023 and an adjustment/refund of Rs 2,08,29,442/- with regard to the Transmission Deviation Charges to be undertaken by NRLDC/NRPC for injection beyond ex-bus installed capacity/ GNA during the lean season and beyond the permissible limit of additional 10% during the peak season for the purposes of primary response;
- (c) pass such further order or orders as this Hon'ble Commission may deem just and proper in the circumstances of the case

Affidavit:

I, Harish Kumar Sharma, S/o Late Shri Inder Dev Sharma, aged about 59 years, resident of Shimla, H.P., do hereby solemnly affirm and say as follows:

1. I say that I am the Chief General Manager of the Petitioner Company herein and am competent and duly authorized to swear this present affidavit on behalf of the Petitioner.
2. I say that I have read the contents of the above Petition filed by the Petitioner and I have understood the contents of the same.
3. I say that the contents of the above Petition are based on information available from the records of the Petitioner Company maintained in the ordinary course of business and I believe them to be true and correct.
4. I say that the Exhibits are true and correct copies of their original.

VERIFICATION

I, the deponent above-named, do hereby verify the contents of the above affidavit to be true to the best of my knowledge and belief and no part of it is false and nothing material has been concealed therefrom.

Verified at Shimla on 15th day of July, 2024

The contents of the affidavit/document were read over and explained to the deponent/executant in vernacular to which he/she admits the same as true and correct at the time of making it.

CENTRAL ELECTRICITY REGULATORY COMMISSION

NEW DELHI

No.L-1/250/2019/CERC

Dated: 4th May 2020

NOTIFICATION

In exercise of the powers conferred under Section 178 read with Part V of the Electricity Act, 2003 (36 of 2003), and all other powers enabling it in this behalf, and after previous publication, the Central Electricity Regulatory Commission hereby makes the following regulations:

CHAPTER 1

PRELIMINARY

1. Short title, extent and commencement

- (1) These regulations may be called the Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020.
- (2) These regulations shall apply to all Designated ISTS Customers (DICs), Inter-State Transmission Licensees, National Load Despatch Centre (NLDC), Regional Load Despatch Centres (RLDCs), State Load Despatch Centres (SLDCs) and Regional Power Committees (RPCs).
- (3) These regulations shall come into force from the date to be separately notified by the Commission.

2. Definitions

- (1) In these Regulations, unless the context otherwise requires:-

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

- (2) Transmission charges for Short Term Open Access shall be payable by generating stations and embedded entities located in the State, as per the last published Short Term Open Access Rate for the State, along with other charges or fees as per Open Access Regulations, 2008 and the Transmission Deviation charges, if any, as per these regulations.
- (3) Transmission charges for Short Term Open Access paid by an embedded intra-State entity during a month shall be reimbursed in the following billing month to the State in which such entity is located.
- (4) Transmission charges for Short Term Open Access, paid by a DIC with untied LTA shall be offset against the transmission charges payable by the said DIC for untied LTA in the following billing month.
- (5) No transmission charges for Short Term Open Access for inter-State transmission system, shall be payable by a distribution licensee which has Long Term Access or Medium Term Open Access or both, or by a trading licensee acting on behalf of such distribution licensee:
- Provided that other charges or fees as per Open Access Regulations, 2008 and the Transmission Deviation charges, if any, as per these regulations shall be payable.
- (6) Transmission charges for Short Term Open Access collected in a billing month, after adjustment as per Clauses (3) and (4) of this Regulation, shall be reimbursed to the DICs in proportion to their share in the first bill in the following billing month.

12. Transmission Deviation

- (1) Transmission Deviation, in MW, shall be computed as under:

- (a) For a generating station, net metered ex-bus injection, in a time block in excess of the sum of Long Term Access, Medium Term Open Access and Short Term Open Access:
- Provided that for a hydro-generating station, overload capacity of 10% during peak season shall be taken into account.
- (b) For a State net metered ex-bus injection or net metered drawal, in a time block, in excess of the sum of Long Term Access and Medium Term Open Access.
- (c) For any drawee DIC, which is a regional entity other than distribution licensees, net metered drawal in a time block in excess of the sum of Long Term Access, Medium Term Open Access and Short Term Open Access.
- (2) Transmission Deviation Rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be computed as under:
- $$1.05 \times (\text{transmission charges of the State for the billing month in Rs.}) / (\text{quantum in MW of Long Term Access plus Medium Term Open Access of the State for the corresponding billing period} \times 2880)$$
- (3) The Transmission Deviation charges shall be recovered through the third bill and shall be reimbursed to the DICs in proportion to their share in the first bill in the following billing month.

CHAPTER 3

SPECIFIC CASES

13. Treatment of transmission charges and losses in specific cases

- (1) No transmission charges and losses for the use of ISTS shall be payable for:

**Central Electricity Regulatory Commission
New Delhi**

Notification

Date: 12th April, 2017

No. L-1/18/2010-CERC – In exercise of powers conferred under clause (h) of sub-section (1) of Section 79 read with clause (g) of sub-section (2) of Section 178 of the Electricity Act, 2003 (36 of 2003), and all other powers enabling it in this behalf, the Central Electricity Regulatory Commission hereby makes the following regulations to amend the Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2010 including the first to fourth amendments thereof (hereinafter referred to as "the Principal Regulations"), namely:-

1. Short title and commencement

- (1) These regulations shall be called the Central Electricity Regulatory Commission (Indian Electricity Grid Code) (Fifth Amendment) Regulations, 2017.
- (2) These regulations shall come into force with effect from 1st May, 2017.

2. Amendment of Regulation 2 in General Part of Principal Regulations

- (1) In Regulation 2(1)(sss) of General Part of Principal Regulations, the definition of 'Spinning Reserves' shall be substituted as under:

(sss) Spinning Reserve means: "the Capacities which are provided by devices including generating station or units thereof synchronized to the grid and which can be activated on the direction of the System Operator and effect the change in active power."

- (2) Regulation 2(2) of General Part of the Principal Regulations shall be substituted as under:

"Words and expressions used in these regulations and not defined herein but defined in the Act or other relevant Regulations of the

(4) The following clause shall be added after Regulation 5.2(f)(i)(b) of Part 5 of the Principal Regulations :

"(c) Open Cycle Gas Turbine/Combined Cycle generating stations having gas turbines of capacity more than 50 MW each: with effect from 01.10.2017"

(5) Regulation 5.2(f)(ii)(a) of Part V of the Principal Regulations shall be substituted as under:

"(a) There should not be any reduction in generation in case of improvement in grid frequency to a level below 50.00 Hz. (For example, if grid frequency changes from 49.9 to 49.95 Hz, or from 49.95 to 49.99 Hz there shall not be any reduction in generation). For any fall in grid frequency, generation from the unit should increase as per generator droop upto a maximum of 5% of the generation subject to ceiling limit of 105% of the MCR of the unit having regard to machine capability".

(6) In Regulation 5.2(f)(iii) of Part 5 of the Principal Regulations, the words "Gas Turbine/Combined Cycle Power Plants" shall be deleted.

(7) The first sentence of Regulation 5.2(h) of Part 5 of the Principal Regulations, shall be substituted as under:

"All coal/lignite based thermal generating units of 200 MW and above, Open Cycle Gas Turbine/Combined Cycle generating stations having gas turbines of more than 50 MW each and all hydro units of 25 MW and above operating at or up to 100% of their Maximum Continuous Rating (MCR) shall have the capability of (and shall not in any way be prevented from) instantaneously picking up to 105%, 105% and 110% of their MCR, respectively, when the frequency falls suddenly."

(8) The following shall be added at the end of Regulation 5.2 (h) of Part 5 of the Principal Regulations:

"For the purpose of ensuring primary response, RLDCs/SLDCs shall not schedule the generating station or unit(s) thereof beyond ex-bus generation corresponding to 100% of the Installed capacity of the generating station or unit(s) thereof. The generating station shall not resort to Valve Wide Open (VWO) operation of units whether running on full load or part load, and shall ensure that there is margin available for providing Governor action as primary response. In case of gas/liquid fuel based units, suitable adjustment in Installed Capacity should be made by RLDCs/SLDCs for scheduling in due consideration of prevailing ambient conditions of temperature and pressure vis-à-vis site ambient conditions on which installed capacity of the generating station or unit(s) thereof have been specified:

Provided that scheduling of hydro stations shall not be reduced during high inflow period in order to avoid spillage:

Provided further that the VWO margin shall not be used by RLDC to schedule Ancillary Services."

(9) The following proviso shall be added at the end of Regulation 5.2 (g) of Part 5 of the Principal Regulations :

"Provided that periodic checkups by third party should be conducted at regular interval once in two years through independent agencies selected by RLDCs or SLDCs as the case may be. The cost of such tests shall be recovered by the RLDCs or SLDCs from the Generators. If deemed necessary by RLDCs/SLDCs, the test may be conducted more than once in two years."

**CENTRAL ELECTRICITY REGULATORY COMMISSION
NEW DELHI**

No. L-1/250/2019/CERC

Dated: 7.02.2023

NOTIFICATION

In exercise of the powers conferred under Section 178 read with Part V of the Electricity Act, 2003 (36 of 2003), and all other powers enabling it in this behalf, and after previous publication, the Central Electricity Regulatory Commission hereby makes the following regulations to amend the Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020 (hereinafter referred to as "the Principal Regulations") namely:

1. Short Title and Commencement:

- (1) These regulations may be called the Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) (First Amendment) Regulations, 2023.
- (2) These regulations shall come into effect from the date as notified by the Commission.

2. Amendment to Regulation 2 of the Principal Regulations:

- (1) Sub-clause (b) of Clause (1) of Regulation 2 of the Principal Regulations shall be substituted as under:

“(b) ‘**Associated Transmission System**’ or ‘**ATS**’ shall have the same meaning as defined in GNA Regulations;”

- (2) In Sub-Clause (j) of Clause (1) of Regulation 2 of the Principal Regulations, the

regulations (in rupees) X 1.10 / (number of days in a month X 96 X GNA and GNA_{RE} quantum , in MW, for all such drawee DICs located in the State considered for billing, for the corresponding billing period).

(2) Transmission charges shall be payable by the entities granted T-GNA or T-GNA_{RE} under Regulation 26.1 of the GNA Regulations, as per the last published T-GNA rate for the State in which such entity is located.

(3) Transmission charges for T-GNA and T-GNA_{RE} collected in a billing month, shall be reimbursed to the drawee DICs in proportion to their share in the first bill in the following billing month, after adjustment of such charges as per sub-clause (d) of Clause (2) of Annexure-III to these regulations.”

10. Amendment to Regulation 12 of the Principal Regulations:

(1) Clauses (1) and (2) of Regulation 12 of the Principal Regulations shall be substituted as under:

“(1) Transmission Deviation, in MW, shall be computed as under:

(a) For a generating station including ESS and captive generating plant, transmission deviation shall be net metered ex-bus injection, in a time block in excess of GNA of such entity:

Provided that for a hydro-generating station, schedules for overload capacity as permissible under the Grid Code during peak season shall not be considered for computing the transmission deviation:

Provided further that transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station, subject to verification of such over-injection by concerned RPC:

Provided also that each RPC shall issue necessary guidelines for

furnishing the data by the generating stations regarding their primary response.

- (b) For a State, transmission deviation in a time block shall be net metered drawal in excess of sum of GNA and T-GNA for all drawee DICs which are intra-State entities in that State:

Provided that, where a State has net metered injection in a time block, transmission deviation in a time block shall be net metered injection in excess of sum of (i) GNA for all drawee intra-State entities in the State, (ii) GNA for injecting intra-State entities (not covered under GNA for the State) and (iii) T-GNA for injecting intra-State entities.

- (c) For a drawee DIC, which is a regional entity and not covered under State GNA, transmission deviation shall be net metered drawal in excess of sum of GNA and T-GNA of the said entity.

- (d) For a drawee DIC, which is a regional entity, having GNA_{RE} or $T-GNA_{RE}$, transmission deviation in a time block shall be net metered drawal in excess of scheduled drawl under GNA_{RE} and $T-GNA_{RE}$ from identified sources as specified in subclauses (i) to (iii) under Regulation 13(2) of the Principal Regulations.

Provided that, if such an entity obtains additional GNA or T-GNA, as permitted under GNA Regulations, for purpose of drawl of power from sources other than identified sources as specified in subclauses (i) to (iii) of Regulation 13(2) of the Principal Regulations, transmission deviation in a time block shall be net metered drawal in excess of sum of [scheduled drawl under GNA_{RE} and $T-GNA_{RE}$ from identified sources as specified in subclauses (i) to (iii) under Regulation 13(2) of the Principal Regulations + quantum of GNA + quantum of T-GNA].

- (2) Transmission Deviation Rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be

computed as under:

1.25 X (total transmission charges for all drawee DICs located in the State, (as calculated in accordance with Regulation 5 to 8 of these regulations) for the billing month in Rs.)/ (GNA and GNA_{RE} quantum in MW of such entities located in the State, considered for billing, for the corresponding billing period X number of days in a month X 96)."

- (2) The word "drawee" shall be inserted before the word "DICs" in Clause (3) of Regulation 12 of the Principal Regulations.

11. Amendment to Regulation 13 of the Principal Regulations:

- (1) The words 'transmission charges and losses' shall be substituted with the words 'transmission losses' in Clause (1) of Regulation 13 of the Principal Regulations.

- (2) In sub-clause (c) to Clause (1) of Regulation 13 of the Principal Regulations, the date '31.12.2022' shall be substituted with the date and words '30.6.2023 or date of operation of the First amendment to these regulations, whichever is earlier'.

- (3) A new subclause (d) shall be added after subclause (c) of Clause (1) of Regulation 13 of the Principal Regulations as under:

"(d) generation based on solar, wind, solar-wind hybrid, Hydro PSP and BESS Projects whose bidding was completed on or before 15.1.2021 and which are declared under commercial operation within the date specified in their respective PPAs."

- (4) Clause (2) of Regulation 13 of the Principal Regulations shall be substituted by Clauses (2) and (2A) as under:

"(2) Waiver of transmission charges for the use of ISTS shall be applicable for scheduling power under GNA, GNA_{RE} T-GNA and T-GNA_{RE} from (i) REGS or RHGS based on wind or solar sources or (ii) ESS charged with energy sourced

विषय: जून 202 माह से जून 2023 माह के बिलिंग महीने (अप्रैल, 2022 से अप्रैल 2023 की बिलिंग अवधि) के संशोधित क्षेत्रीय पारेषण विचलन लेखा ।

Subject: Amendment to Regional Transmission Deviation Accounts for billing months of June, 2022 to June, 2023 (billing period April, 2022 to April, 2023)

महोदय/ Sir,

Kindly refer to Regional Transmission Deviation Accounts for billing months of June, 2022 to June, 2023 (billing period April, 2022 to April, 2023) issued by NRPC sectt. from time to time. Transmission Deviation calculation for said period has been revised due to following reasons:

- Rectify earlier erroneous calculation carried out in in terms of MWh to sum of average block-wise MW.
- Revision in high flow season.
- Discrepancy in net LTA+STOA for KWHEP, PTC (Budhil), Himachal Sorang.
- Non-consideration of drawl of power by Haryana from APCPL and APL-Mundra.
- Non-consideration of drawl of power by Uttar Pradesh from Meja TPS, NAPP, Unchahar-I, Unchahar-II, Tanda-II.
- Non-consideration of drawl of power by states from BBMB stations.

Rectifying the above discrepancies, Amendment to Regional Transmission Deviation Accounts for said period is prepared and enclosed at **Annexure-I** for information and necessary action. Methodology used for calculations of transmission deviation is given at **Annexure-II**.

The concerned entities are requested to intimate the discrepancy / error, if any, within 15 days from the date of issue of the letter. In case no such communication is received from any constituent within 15 days, the accounts will be treated as correct and closed.

Sub: Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020- Comments of SJVN thereof.

Respected Sir,

The Hon'ble Central Electricity Regulatory Commission has notified 'Sharing of Inter-State Transmission Charges and Losses' Regulations, 2020 on 04.05.2020 with an applicability from 01.11.2020 onwards. In the aforesaid Regulation, Transmission Deviation charges is payable to the generator beyond ex-bus injection in a time block (except for peak season) from 01.11.2020 to 30.09.2023 in spite of giving primary response to the National Grid.

1.0 The relevant provisions of aforesaid CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020 are reproduced here as under:

Quote

Regulation (12): Transmission Deviation

(1) Transmission Deviation, in MW, shall be computed as under:

(a) For a generating station, net metered ex-bus injection, in a time block in excess of the sum of Long Term Access, Medium Term Open Access and Short Term Open Access:

Provided that for a hydro-generating station, overload capacity of 10% during peak season shall be taken into account.

NBCC Complex, East Kidwai Nagar, New Delhi-110023
Tele: 011-61901806 Fax: 011-61901807

(2) *Transmission Deviation Rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be computed as under:*

1.05 X (transmission charges of the State for the billing month in Rs.)/ (quantum in MW of Long Term Access plus Medium Term Open Access of the State for the corresponding billing period X 2880).

Further, the Hon'ble CERC vide notification dtd.07.02.23 has issued first amendment of 'Sharing of Inter-State Transmission Charges and Losses' Regulations, 2020, which is applicable from 01.10.2023 onwards. The relevant clauses of Regulation impacting Hydro power generating stations are as under:

10. Amendment to Regulation 12 of the Principal Regulations:

(1) Clauses (1) a n d (2) of Regulation 12 of the Principal Regulations shall be substituted as under:

“(1) Transmission Deviation, in MW, shall be computed as under:

(a) For a generating station including ESS and captive generating plant, transmission deviation shall be net metered ex-bus injection, in a time block in excess of GNA of such entity:

Provided that for a hydro-generating station, schedules for overload capacity as permissible under the Grid Code during peak season shall not be considered for computing the transmission deviation:

Provided further that transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station, subject to verification of such over-injection by concerned RPC:

Provided also that each RPC shall issue necessary guidelines for furnishing the data by the generating stations regarding their primary response.

(2) Transmission Deviation Rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be computed as under:

1.25 X (total transmission charges for all drawee DICs located in the State, (as calculated in accordance with Regulation 5 to 8 of these regulations) for the billing month in Rs.)/ (GNA and GNARE quantum in MW of such entities located in the State, considered for billing, for the corresponding billing period X number of days in a month X 96).”

Unquote

From the aforesaid CERC Sharing of Inter-State Transmission Charges and Losses Regulations and its first amendment, following is inferred:

- Transmission deviation charges is applicable on hydro generating stations on net metered ex-bus injection, in a time block in excess of the sum of Long-Term Access, Medium-Term Open Access and Short-Term Open Access from 01.11.2020 onwards.
- Schedule of Hydro-generating station, for overload capacity of 10 %, as permissible under the Grid Code during peak season shall not be considered for computing the transmission deviation applicable from 01.11.2020 onwards.
- Transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station, subject to verification of such over-injection by concerned RPC applicable from 01.10.2023 onwards.

2.0 The relevant provisions of Central Electricity Regulatory Commission (Indian Electricity Grid Code) (Fifth Amendment) Regulations, 2015 are reproduced here as under:

Quote:

(7) The first sentence of Regulation 5.2(h) of Part 5 of the Principal Regulations, shall be substituted as under:

"All coal/lignite based thermal generating units of 200 MW and above, Open Cycle Gas Turbine/Combined Cycle generating stations having gas turbines of more than 50 MW each and all hydro units of 25 MW and above operating at or up to 100% of their Maximum Continuous Rating (MCR) shall have the capability of (and shall not in any way be prevented from) instantaneously picking up to 105%, 105% and 110% of their MCR, respectively, when the frequency falls suddenly."

(8) The following shall be added at the end of Regulation 5.2 (h) of Part 5 of the Principal Regulations:

"For the purpose of ensuring primary response, RLDCs/SLDCs shall not schedule the generating station or unit(s) thereof beyond ex-bus generation corresponding to 100% of the Installed capacity of the generating station or unit(s) thereof. The generating station shall not resort to Valve Wide Open (VWO) operation of units whether running on full load or part load, and shall ensure that there is margin available for providing Governor action as primary response....."

39

Chief General Manager
C&SO Deptt.
SJVN Limited, Shakti Sadan
Shanan, Shimla-171006 (HP)

Provided that scheduling of hydro stations shall not be reduced during high inflow period in order to avoid spillage:

Provided further that the VWO margin shall not be used by RLDC to schedule Ancillary Services."

Unquote

In compliance of aforesaid Regulations, during lean season/less inflow period, RLDC giving schedule up to Ex -bus installed capacity to the Hydro generating stations by keeping margin up to 10% of the MCR (overload capability) of the generating stations or unit thereof, for getting primary response, when frequency falls suddenly in the Grid.

- 3.0 From the above, it can be inferred that there is a contradiction in both the Regulations viz Sharing of Transmission Charges and Losses and IEGC Regulations. In accordance with the provisions of IEGC Regulations, RLDC is giving schedule to the generating stations corresponding to the 100 % of the Ex bus Installed capacity of generating stations during peaking hrs and margin of 10 % overloading is utilized for giving primary support by the generating station. However, as per the provision of Sharing of Inter-State Transmission Charges and Losses Regulations, transmission deviation charges has been levied to the generating station beyond ex-bus injection in a time block in excess of the sum of Long-Term Access, Medium-Term Open Access and Short-Term Open Access for giving primary support by the generating station.
- 4.0 The Hon'ble CERC has issued the first amendment of Sharing of Inter-State Transmission Charges and Losses Regulations on 07.02.23 by excluding the primary response of the generating stations from the transmission deviation charges payable by the generator, which is effective from 01.10.2023 onwards.
- 5.0 NRPC has issued the Regional Transmission Deviation Account (RTDA) for the period from April, 2022 to November, 2022 on 31.01.23 and for the period from November, 2020 to March, 2022 on 31.07.23. In the said RTDA, transmission deviation charges more than crores of Rupees have been levied to NJHPS and RHPS from 01.11.2020 to till date (from October to April months) by giving primary support to the Grid (refer Annex-I).
- 6.0 SJVN generating stations viz NJHPS and RHPS is giving primary response in accordance with the relevant provisions of CERC IEGC Regulations, 2015, wherein margin up to 10% of the MCR (overload capability) of the generating stations has been kept by NRLDC for getting primary response in case of frequency suddenly falls in the Grid. Therefore, SJVN generating stations may not be penalised for over injection up to 110 % MCR during peaking hrs of lean season (from October to April months) for supporting the Grid, as the

same may be contradictory to the provisions of CERC IEGC Regulations and its amendment issued from time to time.

It is therefore humbly prayed to the Hon'ble Commission for providing relaxation to SJVN generating stations (NJHPS and RHPS) for amount payable against transmission deviation charges for over injection up to 110 % MCR during peaking hrs of lean season (from October to April months) for the previous period (from 01.11.2020 to 30.09.23) in line with the first amendment of CERC Sharing of Transmission Charges and Losses.

सधन्यवाद,

I/30727/2023

charges should be applicable for drawla of power by partner States from BBMB projects.

- 10.2 Since CTU was not present in the meeting, their views could not be recorded. However, EE(C) apprised that GNA quantum for various DICs was notified by CERC regulations, scrutiny of GNA quantum is not under purview of NRPC forum.
- 10.3 Representative from PSPCL stated that CTU might be asked to furnish information, if any, used for working out GNA quantum with PSPCL.
- 10.4 MS, NRPC stated that data breakup, if any, may be shared by CTU to crosscheck calculation by partner states at their end to understand the methodology adopted by CERC. Concerned partner states of BBMB may raise their concern with methodology/ calculations with NRPC sectt.

Decision of the sub-committee:

CTU will share GNA quantum breakup/ calculations, if any, with partner states of BBMB so that they can crosschecked the same.

ITEM-11 Issue of Transmission Deviation charges imposed on RHPS and NJHPS (Agenda by SJVNL)

- 11.1 EE(C) apprised that Hydro station stations are required to provide PRAS up to 10% of Installed Capacity as per IEGC, 2010, the overloading gets reflected, if provided, in the ex-bus injection and if it exceeds the sum of LTA, MTOA & STOA then charges are levied to the generating station beyond ex-bus injection in a time block in accordance with provision of Sharing of Inter-State Transmission Charges and Losses Regulations, 2020.
- 11.2 Representative from SJVNL points that as this is done to support the grid, so for primary response, they should not be penalised for any transmission deviation. Further, the amendment in this regard has been issued by CERC on 07.02.23 by excluding the primary response of the generating stations from the transmission deviation charges, which is effective from 01.10.2023. However, until 30th September 2023, we will be penalised for this even if we are supporting the grid, so in this regard request for relieving penalty for this period.
- 11.3 MS, NRPC opined that issue of all hydro generators regarding transmission deviation charges for the period from implementation of Sharing of Inter-State Transmission Charges and Losses Regulations, 2020 to 30th September 2023 due to primary response may be intimated to CERC.

Decision of the sub-committee:

Letter be written to CERC regarding Transmission deviation charges of all hydro generators for the period from implementation of Sharing of Inter-State Transmission Charges and Losses Regulations, 2020 to 30th September 2023 due to primary response.

I/32257/2023

48th TCC & 70th NRPC Meeting (17-18 Nov 2023)-MoM

measure in TRAS schedule should be out of scope of ToR of the proposed committee.

- A.5.10 MS, NRPC expressed concern that over running a gas plant continuously in open cycle may depreciate the Pool fund at the faster rate. Therefore, formation of committee to prepare SOP for scheduling of gas plants in open cycle operation mode is need of hour.
- A.5.11 NTPC representative commented that operation of gas plant on closed cycle would depend upon the grid conditions and demand scenario.
- A.5.12 It was also discussed that gas plants are in other regions also. Therefore, SOP on national level may be made for uniformity.
- A.5.13 Forum agreed for formation of committee having members from NRPC Sectt., NRLDC, NLDC, NTPC, and IPGCL to formulate revised guidelines under the chairmanship of MS, NRPC. The same shall be informed to NPC.

NRPC Deliberation

- A.5.14 Chairperson, NRPC and MD, HVPN suggested to include CEA in the committee.
- A.5.15 CE (RA division), CEA conveyed to include members from other gas stations in the committee.
- A.5.16 Member Secretary, WRPC and NERPC, and representative from IPGCL raised their willingness to be included in the committee.

Decision of NRPC Forum:

- i. Committee shall be constituted under MS, NRPC having members from CEA, NRPC Sectt., WRPC Sectt., NERPC Sectt., NRLDC, NLDC, NTPC and IPGCL.
- ii. ToR of the committee shall be to devise guidelines for Certification of Percentage of Open Cycle Generation for schedule given by beneficiary as well as under TRAS by RPC.
- iii. NPC Division, CEA may be intimated on the issue for common SOP.

A.6 Issue of transmission deviation charges imposed on hydro generators (agenda by THDC & SJVN)

TCC Deliberation

(a) Issue of transmission deviation charges imposed on Tehri HPP & Koteshwar HEP

I/32257/2023

48th TCC & 70th NRPC Meeting (17-18 Nov 2023)-MoM

- A.6.1 THDCIL India Limited (THDCIL) representative stated that they are supplying energy in Northern Grid from its operating Tehri HPP and Koteshwar HEP generating stations to the beneficiaries of Northern Region. Both Tehri HPP and Koteshwar HEP projects are also providing primary (FGMO) and secondary (AGC) responses to the grid in compliance of the Indian Electricity Grid Code (IEGC).
- A.6.2 As per IEGC, 2010, if the ex-bus injection exceeds the sum of LTA, MTOA & STOA then charges are levied to the generating station beyond ex-bus injection in a time block in accordance with provision of Sharing of Inter-State Transmission Charges and Losses Regulations, 2020. Further, Hon'ble Commission issued amendment vide Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) (First Amendment) Regulations, 2023 and allowed that transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station, subject to verification of such over-injection by concerned RPC.
- A.6.3 Despite, Tehri HPP & Koteshwar HEP are supporting the grid by providing primary (FGMO) and secondary response (Automatic Generation Control), both plants are being penalized by imposition of transmission deviation charges. It is worth mentioning here that as per the above amendment w.e.f. 01.10.2023, transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station. This exclusion shows that grid support should not be penalized.
- A.6.4 Therefore, THDCIL representative requested that the transmission deviation charges shall not be levied for the quantum of over-injection provided for primary and secondary response in past and secondary response to be provided in future by a generating station. Furthermore, the charges previously remitted for transmission deviation may be revoked and refunded to the hydro-generator.

(b) Issue of Transmission Deviation charges imposed on RHPS and NJHPS

- A.6.5 SJVN representative apprised that Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020 was notified on 04.05.2020 with applicability from 01.11.2020 onwards. The relevant provisions of aforesaid Regulations are reproduced here as under:

Regulation (12): Transmission Deviation

- (1) Transmission Deviation, in MW, shall be computed as under

 Chief General Manager
 C&SO Deptt.
 SJVN Limited, Shakti Sadan
 Shanan, Shimla-171006 (HP)

I/32257/2023

48th TCC & 70th NRPC Meeting (17-18 Nov 2023)-MoM

- a) *For a generating station, net metered ex-bus injection, in a time block in excess of the sum of Long Term Access, Medium Term Open Access and Short Term Open Access:*

Provided that for a hydro-generating station, overload capacity of 10% during peak season shall be taken into account.

- (2) Transmission deviation rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be computed as under:

*1.05 X (transmission charges of the State for the billing month in Rs.)/
(quantum in MW of Long Term Access plus Medium Term Open Access of the State for the corresponding billing period X 2880)*

- A.6.6 Further, CERC vide notification dated 07.02.23 has issued first amendment of 'Sharing of Inter-State Transmission Charges and Losses' Regulations, 2020, which is applicable from 01.10.2023 onwards. The relevant clauses of Regulation impacting Hydro power generating stations are as under:

10. Amendment to Regulation 12 of the Principal Regulations:

- (1) Clauses (1) a n d (2) of Regulation 12 of the Principal Regulations shall be substituted as under:*

"(1) Transmission Deviation, in MW, shall be computed as under:

- (a) For a generating station including ESS and captive generating plant, transmission deviation shall be net metered ex-bus injection, in a time block in excess of GNA of such entity:*

Provided that for a hydro-generating station, schedules for overload capacity as permissible under the Grid Code during peak season shall not be considered for computing the transmission deviation:

Provided further that transmission deviation charges shall not be levied for the quantum of over-injection for providing primary response by a generating station, subject to verification of such over-injection by concerned RPC:

I/32257/2023

48th TCC & 70th NRPC Meeting (17-18 Nov 2023)-MoM

Provided also that each RPC shall issue necessary guidelines for furnishing the data by the generating stations regarding their primary response.

2) *Transmission deviation rate in Rs./MW, for a State or any other DIC located in the State, for a time block during a billing month shall be computed as under:*

1.25 X (total transmission charges for all drawee DICs located in the State, (as calculated in accordance with Regulation 5 to 8 of these regulations) for the billing month in Rs.)/ (GNA and GNARE quantum in MW of such entities located in the State, considered for billing, for the corresponding billing period X number of days in a month X 96)."

A.6.7 The relevant provisions of Central Electricity Regulatory Commission (Indian Electricity Grid Code) (Fifth Amendment) Regulations, 2015 are reproduced here as under:

Quote:

(7) The first sentence of Regulation 5.2(h) of Part 5 of the Principal Regulations, shall be substituted as under:

"All coal/lignite based thermal generating units of 200 MW and above, Open Cycle Gas Turbine/Combined Cycle generating stations having gas turbines of more than 50 MW each and all hydro units of 25 MW and above operating at or up to 100% of their Maximum Continuous Rating (MCR) shall have the capability of (and shall not in any way be prevented from) instantaneously picking up to 105%, 105% and 110% of their MCR, respectively, when the frequency falls suddenly."

(8) The following shall be added at the end of Regulation 5.2 (h) of Part 5 of the Principal Regulations:

"For the purpose of ensuring primary response, RLDCs/SLDCs shall not schedule the generating station or unit(s) thereof beyond ex-bus generation corresponding to 100% of the Installed capacity of the generating station or unit(s) thereof. The generating station shall not resort to Valve Wide Open (VWO) operation of units

I/32257/2023

48th TCC & 70th NRPC Meeting (17-18 Nov 2023)-MoM

whether running on full load or part load, and shall ensure that there is margin available for providing Governor action as primary response.....

Provided that scheduling of hydro stations shall not be reduced during high inflow period in order to avoid spillage:

Provided further that the VWO margin shall not be used by RLDC to schedule Ancillary Services."

Unquote

- A.6.8 In compliance of aforesaid Regulations, during lean season/less inflow period, RLDC giving schedule up to Ex -bus installed capacity to the Hydro generating stations by keeping margin up to 110% of the MCR of the generating stations or unit thereof, for getting primary response, when frequency falls suddenly in the Grid.
- A.6.9 From the above, it can be inferred that there is a contradiction in both the Regulations viz Sharing of Transmission Charges and Losses and IEGC Regulations. In accordance with the provisions of IEGC Regulations, RLDC is giving schedule to the generating stations corresponding to the 100 % of the Ex-bus Installed capacity of generating stations during peaking hrs and margin of 10 % overloading is utilized for giving primary support by the generating station. However, as per the provision of Sharing of Transmission Charges and Losses Regulations, transmission deviation charges were levied on generating station beyond ex-bus injection in a time block in excess of the sum of Long-Term Access, Medium-Term Open Access and Short-Term Open Access for giving primary support by the generating station.
- A.6.10 CERC vide notification dtd.07.02.2023 has issued first amendment of 'Sharing of Inter-State Transmission Charges and Losses' Regulations, 2020, effective from 01.10.2023 onwards, wherein primary response given by generating stations has been excluded for calculating the transmission deviation charges. However, in terms of CERC Sharing of Transmission Charges and Losses Regulations, transmission deviation charges more than crores of Rupees have been levied to NJHPS and RHPS from 01.11.2020 to 30.09.2023 by giving primary support to the Grid.
- A.6.11 Issue of Transmission Deviation charges imposed on RHPS and NJHPS was also taken up in previous 47th Commercial Sub-committee meeting held on 28.08.2023. Decision of Sub-Committee as given in MOM, as under:

 Chief General Manager
 C&SO Deptt.
 SJVN Limited, Shakti Sadan
 Shanan, Shimla-171006 (HP)

I/32257/2023

48th TCC & 70th NRPC Meeting (17-18 Nov 2023)-MoM

Letter be written to CERC regarding Transmission deviation charges of all hydro generators for the period from implementation of Sharing of Inter-State Transmission Charges and Losses Regulations, 2020 to 30th September 2023 due to primary response.

- A.6.12 In compliance of CERC IEGC Regulation prevailing during the period from 01.11.2020 to 30.09.23, generator was giving peaking support to the Grid up to 10 % overloading beyond Ex-bus installed capacity, as per the droop setting defined in the CERC Regulation. Therefore, generator should not be penalized during such period from 01.11.2020 to 30.09.2023 for giving primary response to the Grid. Also, in case of reduction of frequency of Grid and generator is giving more primary support to the Grid, then such quantum may also be excluded for calculating the transmission deviation charges. Hence, some methodology/procedure may be adopted by NRPC for calculation of transmission deviation charges based on frequency of the Grid.
- A.6.13 In view of above, SJVN requested forum to deliberate on following provisions of CERC Sharing of Transmission Charges and Losses Regulations:
- For the period from 01.11.2020 to 30.09.2023, imposition of transmission deviation charges on NJHPS and RHPS, in spite of giving primary support to the Grid in compliance of CERC IEGC Regulations.
 - Procedure for calculating primary response in consonance with CERC IEGC regulations and CERC DSM regulations especially during frequency reduction, so that imposition of transmission deviation charges on generator may be avoided for giving peaking support to the Grid.
- A.6.14 EE (C), NRPC informed that in 2020 regulation, there was no mechanism to waive off the deviation caused by Primary response. However, since the enactment of 1st amendment to ISTS sharing regulations from 01.10.2023, PRAS will be waved off from RTDA.
- A.6.15 DGM, SJVN highlighted that despite their support to Grid, they were being penalized, and deviation charges should be exempted and procedure for this is to be defined.
- A.6.16 GM, NRLDC opined that SCADA data for unit load set point and set point taken due to PRAS, frequency change during PRAS action, and droop setting of generators may be utilized in calculating waiver for PRAS response in RTDA.
- A.6.17 GM, NHPC stated that additional tabs will be added in SCADA software such as set point, actual generation and dip rate.

I/32257/2023

48th TCC & 70th NRPC Meeting (17-18 Nov 2023)-MoM

- A.6.18 EE (C), NRPC stated that methodology for waving off this deviation will be discussed in the next Commercial Sub Committee meeting to be scheduled in 1st week of December 2023. All GENCOs were requested to send their inputs such as droop, set value etc. to NRPC Secretariat.
- A.6.19 MS, NRPC suggested utilities to approach the Honorable CERC for getting waiver on the deviation charges imposed before 1.10.2023. A petition may be filed.
- A.6.20 CE (GM division), CEA mentioned that DVC had such issues which were taken into consideration of Chairperson, CEA.
- A.6.21 Forum decided to send a letter to Chairperson, CEA about this matter for waiving off deviation charges as Chairperson, CEA is ex-officio member of CERC.

NRPC Deliberation

Forum concurred on deliberation held in the TCC meeting.

Decision of NRPC Forum:

- i. Forum acknowledged the issue of generators and agreed that generators shall not be penalized for supporting grid. However, relaxation from regulation is not mandate of NRPC. Therefore, for waiver of transmission deviation charges for the period 01.11.2020 to 30.09.2023, generators may approach CERC.
- ii. Chairperson, CEA may be apprised this issue of generators as he is ex-officio member of CERC.
- iii. The methodology for waving off these deviation charges starting from 01.10.2023 will be discussed in the next Commercial Sub-Committee meeting, to be scheduled in 1st week of December.
- iv. Generators—were asked to provide input such as set value, droop, etc. to NRPC Sectt.

A.7 Technical constraints in context to transmission deviation charge on Koteshwar HEP (agenda by THDCIL)**TCC Deliberation**

- A.7.1 THDC representative apprised that the CTU's bus reactor (125 MVAR) is installed at Koteshwar HEP switchyard and energy consumed/drawn by bus Reactor is being calculated in account of Koteshwar HEP as per the RTDA issued by NRPC.

विषय: जनवरी, 2021 से दिसंबर, 2022 माह के बिलिंग महीने (नवम्बर, 2020 से अक्टूबर, 2022 की बिलिंग अवधि) के संशोधित आर.टी.ए. एवं आर.टी.डी.ए.।

Subject: Amendment to RTA and RTDA for billing month of January, 2021 to December, 2022 (billing period November, 2020 to October, 2022).

महोदय/ Sir,

Please refer to RTA and RTDA for the billing months of January, 2021 to December, 2022 (billing period November, 2020 to October, 2022) issued by this office.

NLDC vide notification dated 06.10.2023 has revised the transmission charges payable by DICs for the billing months of January 2021 to December 2022 (billing period November, 2020 to October, 2022). RTA and RTDA for said period has been revised due to following reasons:

- Due to change in bilateral portion of transmission charges for Adani Renewable Energy Park Rajasthan Limited (AREPRL) from July'21 to Apr'22 billing period
- Due to exemption of the share of Uttar Pradesh from Unchahar Stage-2.
- Rectify erroneous calculation of drawl of power by Haryana from APCPL and APL-Mundra.

Rectifying the above discrepancies, amendments to RTAs (Annexure-I) and RTDAs (Annexure-II) for the aforementioned months are attached herewith for further necessary action by the constituents. Methodology used for calculations of transmission deviation is given at Annexure-III.

The concerned agencies are requested to intimate the discrepancy / error, if any, within 15 days from the date of issue of this account.

अनुलग्नक – यथोपरि।

Encl.: As above.

2.3. Special cases:

- a. Regulation 12.1(a) provides that, for a hydro-generating station, overload capacity of 10% during peak season shall be taken into account. As such, LTA quantum used for calculation of RTDA is increased by 10% for High flow months as follows:

Station	FY 2021-22	FY 2022-23
Bairasiul	May to September	May to September
Chamera	May to September	May to September
Chamera-II	May to September	May to September
Chamera-III	May to September	May to September
Dhauliganga	May to September	May to September
Dulhasti	June to October	May to September
KWHEP	May to September	May to September
Kishanganga	May to September	May to September
Koldam	June to October	May to September
Koteshwar	May to September	May to September
Nathpa Jhakri	May to September	May to September
Parbati-III	May to September	May to September
PTC (Budhil)	May to September	May to September
Rampur	May to September	May to September
Salal	May to September	May to September
Sewa-II	May to September	May to September
Tanakpur	May to September	May to September
Tehri	June to October	May to September
Uri	May to September	May to September
Uri-II	May to September	May to September

- b. Drawl of start-up power by Generating stations from ISTS is considered as Transmission Deviation and charged at Transmission Deviation Rate for the State in which they are located.
- c. Drawl of Aux. Power by Generating stations or Injection of power in ISTS by a state is considered as Transmission deviation and charged at Transmission Deviation Rate.

विषय: जून 2022 माह से जून 2023 माह के बिलिंग महीने (अप्रैल, 2022 से अप्रैल 2023 की बिलिंग अवधि) के संशोधित क्षेत्रीय पारेषण विचलन लेखा ।

Subject: Amendment to Regional Transmission Deviation Accounts for billing months of June, 2022 to June, 2023 (billing period April, 2022 to April, 2023) ✓

महोदय/ Sir,

Kindly refer to Regional Transmission Deviation Accounts for billing months of June, 2022 to June, 2023 (billing period April, 2022 to April, 2023) issued by NRPC sectt. from time to time. Transmission Deviation calculation for said period has been revised due to following reasons:

- Rectify earlier erroneous calculation carried out in in terms of MWh to sum of average block-wise MW.
- Revision in high flow season.
- Discrepancy in net LTA+STOA for KWHEP, PTC (Budhil), Himachal Sorang.
- Non-consideration of drawl of power by Haryana from APCPL and APL-Mundra.
- Non-consideration of drawl of power by Uttar Pradesh from Meja TPS, NAPP, Unchahar-I, Unchahar-II, Tanda-II.
- Non-consideration of drawl of power by states from BBMB stations.

Rectifying the above discrepancies, Amendment to Regional Transmission Deviation Accounts for said period is prepared and enclosed at **Annexure-I** for information and necessary action. Methodology used for calculations of transmission deviation is given at **Annexure-II**.

The concerned entities are requested to intimate the discrepancy / error, if any, within 15 days from the date of issue of the letter. In case no such communication is received from any constituent within 15 days, the accounts will be treated as correct and closed.

अनुलग्नक – यथोपरि ।

Encl.: As above.

भवदीय

Yours faithfully,

Signed by Anzum Parwej

Date: 31-07-2023 11:31:27

Annexure-II

1. Provisions as per CERC (Sharing of ISTS Charges and losses) Regulations, 2020:

1.1. Regional Transmission Accounts and Regional Transmission Deviation Accounts for the billing month for the DICs shall be prepared by the Secretariat of the respective Regional Power Committee on the basis of:

- DIC-wise transmission charges for the billing month, as furnished by the Implementing Agency; and
- Meter readings of all Special Energy Meters for computation of Transmission Deviations for every time block of the corresponding billing period, as furnished by respective RLDCs.

2. Methodology adopted for calculation of RTDA as the said Regulations:

2.1. Transmission Deviation, in MW, in a time-block is computed as under:

Type of DIC	Transmission Deviation
Generating Station	Net metered ex-bus injection- (LTA + MTOA+ STOA)
State	Net metered Drawl- (LTA + MTOA)
Other Drawee DIC	Net metered Drawl - (LTA + MTOA+ STOA)

Where:

- LTA - Long Term Access
MTOA - Medium Term Open Access
STOA - Short Term Open Access
DIC - Dedicated ISTS Customer

Net metered ex-bus injection by Generating Stations/ Net metered Drawl and sum of LTA, MTOA, STOA (as the case may be) used for calculations of transmission deviation are given in the supporting file.

2.2. Regulation 12.1(a) provides Transmission Deviation Rate, in ₹/MW, as under

$$1.05 \times \frac{(\text{Transmission charges of state in billing month})}{(\text{LTA} + \text{MTOA of state in MW}) \times 2880}$$

Transmission Deviation Rate so derived is applicable to the respective State and any other DIC embedded in that state.
